

# Funcons-beta: Booleans \*

The P<sub>L</sub>anCompS Project

Booleans.cbs | PLAIN | PRETTY

---

## Booleans

```
[ Datatype  booleans
  Alias     bools
  Funcon    true
  Funcon    false
  Funcon    not
  Funcon    implies
  Funcon    and
  Funcon    or
  Funcon    exclusive-or
  Alias     xor ]
```

```
Datatype  booleans ::= true | false
```

```
Alias     bools = booleans
```

```
Funcon    not(_ : booleans) : ⇒ booleans
```

**not**( $B$ ) is logical negation.

```
Rule      not(false) ⇔ true
```

```
Rule      not(true) ⇔ false
```

```
Funcon    implies(_ : booleans, _ : booleans) : ⇒ booleans
```

**implies**( $B_1, B_2$ ) is logical implication.

```
Rule      implies(false, false) ⇔ true
```

```
Rule      implies(false, true) ⇔ true
```

```
Rule      implies(true, true) ⇔ true
```

```
Rule      implies(true, false) ⇔ false
```

```
Funcon    and(_ : booleans*) : ⇒ booleans
```

---

\*Suggestions for improvement: [plancomps@gmail.com](mailto:plancomps@gmail.com).  
Reports of issues: <https://github.com/plancomps/CBS-beta/issues>.

`and( $B, \dots$ )` is logical conjunction of any number of Boolean values.

*Rule* `and( )`  $\rightsquigarrow$  `true`

*Rule* `and(false,  $_*$  : bools*)`  $\rightsquigarrow$  `false`

*Rule* `and(true,  $B^*$  : bools*)`  $\rightsquigarrow$  `and( $B^*$ )`

*Funcon* `or( $_$  : bools*)` :  $\Rightarrow$  `bools`

`or( $B, \dots$ )` is logical disjunction of any number of Boolean values.

*Rule* `or( )`  $\rightsquigarrow$  `false`

*Rule* `or(true,  $_*$  : bools*)`  $\rightsquigarrow$  `true`

*Rule* `or(false,  $B^*$  : bools*)`  $\rightsquigarrow$  `or( $B^*$ )`

*Funcon* `exclusive-or( $_$  : bools,  $_$  : bools)` :  $\Rightarrow$  `bools`

*Alias* `xor` = `exclusive-or`

`exclusive-or( $B_1, B_2$ )` is exclusive disjunction.

*Rule* `exclusive-or(false, false)`  $\rightsquigarrow$  `false`

*Rule* `exclusive-or(false, true)`  $\rightsquigarrow$  `true`

*Rule* `exclusive-or(true, false)`  $\rightsquigarrow$  `true`

*Rule* `exclusive-or(true, true)`  $\rightsquigarrow$  `false`
